Honors / Awards

Nominated for the 2020 Excellence in Honors Mentoring Award from the University of Delaware, Honors Program.

Ratlidge Family Award, 2019, for Delaware Public Service from the University of Delaware.

Fulbright Scholar Award, 2016-2018, Council for International Exchange of Scholars.

The Bahamas is currently home to a growing 350,000 residents. Such growth holds great promise for expansion of local food production efforts and at the same time creates concern as an aging population faces increased rates of diabetes and obesity and associated comorbidities. With funds available through the Fulbright award, a partnership will be formally established with COB/UOB and the University of Delaware which will promote the exchange of ideas and undertake research to understand 1) What is the nature and extent of food insecurity in the Bahamas? and 2) To what extent is there a need for a national “buy local” food campaign?
